II. Thesis title (proposed):

This can be changed in your final thesis.

III. Thesis project.

Briefly outline the proposed research project that will be the basis of your honors thesis. Describe the scientific rationale, the methods to be used and the way the data are to be analyzed. **Include a list of key references.** If you are part of a research team, for which aspects of the research project will you be responsible. (Use additional pages if necessary)

V. Sponsor's Section

Students can be expected to devote 10-20 hours per week on the project during the school year. Faculty sponsors are expected to be available for regularly scheduled meetings with the student to review work and analyze progress. Students are expected to be intellectually involved in original research, with expectations appropriate for their level of experience.

1. Describe your role in the project and the role that you propose for the student. Will the student be supervised directly by you or by someone else in the laboratory?

2. Are sufficient resources available in your laboratory to support the students' project to completion?

3. In what laboratory activities, other than the research itself, will the student participate (e.g. regular laboratory meetings, etc.)?
